

YOUSIF AL-ABBASI

Snellville, GA | 770-589-4645 | yousifabassi2015@gmail.com | linkedin.com/in/yousifala | yousif.cc

PROFESSIONAL SUMMARY

Recent A.A.S. Mechatronics graduate and incoming B.S. Mechatronics Engineering student with hands-on training across electrical, mechanical, automation, and fluid-power systems. Experienced in PLC and I/O troubleshooting, motor controls, sensors and actuators, pneumatics, hydraulics, robotics, preventive-maintenance fundamentals, and technical documentation. Brings reliable operations experience, clear team communication, and a safety-focused approach to learning and supporting industrial equipment.

EDUCATION

B.S. Mechatronics Engineering | Kennesaw State University | Incoming Fall 2026 | Expected 2029

Associate of Applied Science in Mechatronics | Gwinnett Technical College | 2026

- Mechatronics Technician Certificate, 2026

TECHNICAL SKILLS

PLCs & Controls: Studio 5000/Logix 5000, ladder logic, station I/O, sensors, actuators, process sequences

Electrical & Motor Controls: AC/DC circuits, schematics, wiring diagrams, relays, contactors, starters, fuses, VFD fundamentals

Mechanical & Maintenance: Hand tools, bearing replacement, shaft alignment, dial indicators, component inspection, equipment testing

Fluid Power & Robotics: Pneumatics, hydraulics, cylinders, valves, pressure/flow concepts, FANUC pendant programming and path basics

Safety & Documentation: PPE, lockout/tagout concepts, industrial safety, written procedures, test results, troubleshooting documentation

HANDS-ON TECHNICAL TRAINING

- Programmed and troubleshoot PLC training stations using ladder logic, Studio 5000/Logix 5000, station I/O, sensors, outputs, and production-style sequences.
- Built, wired, tested, and diagnosed AC/DC and motor-control circuits using relays, starters, fuses, sensors, actuators, electrical schematics, and test equipment.
- Troubleshoot mechanical, electrical, pneumatic, hydraulic, and PLC training systems while following written procedures and lab safety requirements.
- Practiced maintenance fundamentals through bearing replacement, shaft alignment, dial-indicator measurements, component inspection, and equipment testing.
- Completed FANUC robotics and fluid-power labs involving pendant programming, positions, offsets, cylinders, valves, pressure, flow, and sequence troubleshooting.

WORK EXPERIENCE

Process Guide | Amazon | 2023-2024

- Supported fast-paced distribution operations by monitoring workflow, assigning daily tasks, and helping team members meet productivity, quality, and safety goals.
- Communicated operational issues, adjusted to changing priorities, and maintained accurate, organized work areas.

Service Advocate | Target | 2024-2025

- Resolved customer questions and service issues through clear communication, attention to detail, and consistent procedure-following.
- Supported team coverage, daily organization, and task completion in a high-volume environment.

ADDITIONAL

Languages: English and Arabic | **Strengths:** Troubleshooting, teamwork, organization, adaptability, safety awareness, and technical communication
